- **Upper Extremities Analysis**
- **Lower Extremities Analysis**

In Honor:

Kenneth E. Yochum, DC

Dr. Kenneth E. Yochum was a native of South St. Louis, MO where he practiced chiropractic for 45 years. He was a certified instructor in the NIMMO Receptor Tonus technique and taught with the inventor Dr. Raymond Nimmo. He was a 1936 graduate of the Missouri Chiropractic College and became an adopted alumnus of the Logan College of Chiropractic when his school closed.

Terry R. Yochum

DC, DACBR, Fellow, ACCR, FICC

Dr. Terry R. Yochum is a second-generation chiropractor and a cum laude graduate of the National College of Chiropractic, where he subsequently completed his radiology specialty. Dr. Terry R. Yochum is currently Director of the Rocky Mountain Chiropractic Radiological Center in Denver, Colorado, and an Adjunct Professor of Radiology at the Southern California University of Health Sciences (formerly LACC) and the University of Colorado School of Medicine.

Alicia M. Yochum

RN, DC, DACBR, RMSK

Dr. Alicia M. Yochum received her Bachelor of Science in Nursing from Point Loma Nazarene University and then worked in the ICU for one year before matriculating to Logan College of Chiropractic. She completed her diagnostic imaging residency at Logan in 2015, and received her DACBR in October of 2015, becoming the first second-generation DACBR in the history of chiropractic. She has completed a fellowship with an emphasis in musculoskeletal diagnostic ultrasound at Logan University.

"Having looked into all of the various digital radiography (DR) systems, we purchased the Rayence system. We have been extremely happy with the beautiful detail of the images, the quickness through which you can see the images after the exposure and the excellent detail and contrast produced by the Rayence system. We can do a full cervical, thoracic and lumbar series with the quick Rayence DR system in 15 minutes. We highly recommend that doctors of chiropractic who will be looking into DR radiography in the future visit the website for Rayence and consider their digital panel for their practice."

- Drs. Alicia and Terry Yochum

Drs. Alicia and Terry Yochum, are using a dual panel configuration for their practice to increase their workflow and make their first shot, their best shot.
